

The Classic Freeride sail

The V6 tradition returns: serious performance in a package that is lightweight, easy handling and fun. The all new V6 represents a return to the basics: easy planing, high speed & fun with minimal hassle. With a deep profile and an increased boom length, it is the ideal sail for light-medium winds and freeride boards. The V6 boasts very early planing capabilities combined with an increased top speed and effortless upwind performance. With just 6 battens and a strictly flatwater outline, the V6 is very light in the hands making it effortless to sail. Furthermore, the use of two intercams in a narrow luff pocket make waterstarting and gifting a breeze. The V6 is a return to the basics, faster than a Supernova and more maneuverable than a V8, a sail that allows the rider to focus simply on blasting and having fun.
